*because we developed it here*

## **CGear Multimat**

Yeah...that's right, the CGear Multimat was originally designed as a deployable helimat to eliminate dirt, dust and debris from being kicked up by the helicopters rotors when landing. The product was so successful in eliminating sand, dirt and dust from helicopter landings that we applied it to camping sites and hey bingo! You can now say good bye to the dirty weekend...well, sort of.

The CGear Multimat is specifically designed to keep sand and dirt to a minimum. Sand and dirt fall straight through the mat to the ground beneath-but not back up through the mat. The CGear Multimat is ideal as outdoor living areas and provide a sand and dirt free area for camping sites.

Designed in Australia for Australian conditions by a proudly Australian owned company.

- **Dual layer, synthetic mesh mat**
- **Used by the military as a deployable helimat**
- **Sand and dirt fall readily through the mat**
- **UV stabilisers minimise degradation of mats from exposure to the sun**
- **Gives 90% UV protection when used as a shade mat**
- **Non-absorbent and will not rot or mould**
- **Liquid spills (drinks, etc) go through the mat**
- **Not slippery when wet or dry**
- **More environmentally friendly on the grass underneath the mat than tarpaulins**
- **Synthetic meshing won't tear or fray**
- **Supplied with a reusable, heavy duty carry bag**

### **Sizes**

- **1.8m x 2.4m (6ft x 8ft)**
- **3.35m x 2.4m (11ft x 8ft)**
- **4.3m x 2.4m (14ft x 8ft)**
- **5.2m x 2.4m (17ft x 8ft)**
- **6.0m x 2.4m (20ft x 8ft)**
- **3.6m x 4.6m (12ft x 15ft)**
- **3.05m x 3.05m (10ft x 10ft)**
